Upon further consideration and clarification with respect to the claimed invention, it is held that while Jung and Koenig teach the use of DC/DC converters for providing a multiple or fractional voltage to the electric energy storage device, neither reference is held to reasonably teach the method of further controlling the voltage provided to said electric energy storage device in response to a. voltage related to said load by (c) increasing or (d) decreasing said voltage provided to said electric storage device above or below said multiple or said fraction to increase response of said electric storage device to load transients.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
